

MONODEC

Polished Concrete Flooring for:

- ✓ Hospitals & Schools
- ✓ Retail & Leisure
- ✓ Airports & Railways
- ✓ Manufacturing
- ✓ Food & Drink
- ✓ Warehousing

Monodec Polished Concrete Flooring

Transform an existing concrete slab into a stunning, easily cleaned, hardwearing and high performance surface using specialist grinding and polishing techniques designed to bring out the best in the concrete below.

The Monodec system uses diamond grinding techniques to remove the surface laitance and expose the natural aggregates used in the concrete mix. A number of specialist repair, densifying and staining products can then be used to treat the slab, strengthen the concrete and add colour and uniformity to the surface if required.

Polishing and grinding techniques are then employed to achieve a super flat, super glossy finish that is durable, easy to clean and maintain alongside offering clients a lifecycle cost that is typically 60% less than traditional floor coverings.

Benefits of Monodec Grande Lux

✓	Easily cleaned and maintained seamless surface
✓	Offers excellent strength, wear resistance and durability
✓	Delivers chemical and liquid resistance
✓	Offers excellent slip resistance due to the micro-profile of the surface
✓	Suitable for new build and refurbishment
✓	Unlimited lifespan and low lifecycle cost projections
✓	Uses as much as 30 times less energy than traditional flooring
✓	Add a coloured stain or pattern to the concrete surface

FEATURED SYSTEM:
**MONODEC
GRANDE LUX**

UNTREATED
CONCRETE SLAB

Monodec Grande Lux

A specialist treatment designed to deliver a high aesthetic finish from the existing concrete slab.

Monodec Grande Lux showcases the natural beauty of the balast in the existing concrete slab with a super glossy, light-reflective finish that offers excellent chemical resistance and does not mark when subject to rubber-wheeled traffic.

Euco QWIKstitch

A two-component urethane repair liquid that is used to mend cracks in concrete, spalled joints and damaged or uneven concrete surfaces. Its fast cure time makes quick work of repair jobs with floors that can be fully trafficked in less than one hour.

Euco Diamond Hard

A unique blend of silicate and silicate polymers that penetrate concrete surfaces and chemically react to increase surface density, durability and abrasion resistance. Concrete treated with Euco Diamond Hard is dust-proof, resists tyre marks and is easier to maintain.

Vibra Stain SB

A special blend of dyes in solvent-soluble powder formulated to be mixed with acetone to create deeply penetrating vibrant semi-transparent color for concrete surfaces. Vibra-Stain SB is specially formulated for use when creating polished interior concrete surfaces.

UltraGuard

A water-based polymeric protectant that improves the appearance and durability of concrete floors. UltraGuard contains a powerful stain-resistant additive and is further enhanced with lithium silicate, which provides densification of the concrete surface.
